

GeminiSeries 2.0

TAKE Supply Chain's next generation enterprise mobility and data collection solution

**DOMAIN
EXPERTISE**

Gemini 2.0 highlights:

- Oracle EBS 11i, R12, SAP
- User-friendly Windows UI
- Administrator level configurations
- 1D and 2D Matrix/QR barcode support
- Voice transactions
- RFID transactions
- Batch/offline transactions
- Remote/outside the 4 walls
- Smart device scanning with all major mobile OSs
- Runs on Windows 7 Server

A Pioneer in Data Collection Excellence

For nearly two decades, TAKE Supply Chain's GeminiSeries® mobile data collection software has served as a single daily source of traceability for hundreds of millions of dollars in materials and finished goods for leading companies across the globe. Companies of all sizes have utilized Gemini to seamlessly extend their existing Oracle® EBS and SAP® to the shop and warehouse floor and bridge the gaps between ERP, MRP, WMS and TMS systems.

The Next Generation of Innovation

Building on that success, this next generation solution leverages the reliability, stability and flexibility of the original Gemini, the learnings gathered through nearly twenty years of customer experience, and the best of today's emerging technology to bring a new level of visibility, mobility and agility to our customers' supply chain operations. Gemini 2.0 delivers a robust transaction set within leading-edge architecture to provide the enhanced flexibility and expandability our customers need for years to come.

Stability and Powerful New Features

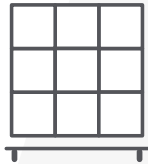

Gemini's longstanding and seamless integration with Oracle continues in this updated version with support for both EBS 11i and R12. Integration with SAP is also available. Multiple language support enables greater expansion into more regions, while the new user-friendly Windows interface allows smoother and easier transaction handling. Smart device scanning with all major mobile operating systems (Windows, Android, iOS) allows the use of tablets and smartphones for greater equipment options and scalability, and the expanded barcode support will deliver greater package and item tracking flexibility.

GeminiSeries 2.0

For nearly two decades, TAKE Supply Chain's GeminiSeries mobile data collection software has served as a single daily source of traceability for hundreds of millions of dollars in materials and finished goods for leading companies across the globe.

RECEIVING

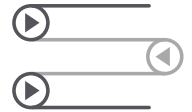

INVENTORY

MANUFACTURING

SHIPPING

OPM

Gemini 2.0 highlights:

- Comprehensive set of transactions
 - Receiving
 - Inventory
 - Manufacturing/WIP
 - Warehouse
 - Shipping
 - OPM-Specific

Gemini 2.0 Voice & Gemini 2.0 Remote

Voice transactions and secure cloud-based batch and off-line data collection capabilities are also now a part of Gemini 2.0. Partnering with leading voice technology providers like Mountain Leverage, we are able to offer a variety of voice picking and put-away transactions for customers utilizing Oracle or SAP back office systems.

Gemini 2.0 Remote runs on smart devices, such as phones and tablets and provides a full extension of your Oracle or SAP data collection functions outside the four walls. Field sales and service information is now as current as activities that are on-premise. Contact us today for more information regarding either of these powerful features.

Contact your Account Executive for more information and a demonstration of Gemini 2.0.
